Geomechanics Literature Search Service

The Rock Mechanics Information Service will carry out retrospective searches on request. This search service includes: (i) a keyword search of computer files covering material from 1969–1976 (no abstracts available), and (ii) a search of the online data base Geomechanics Abstracts (GMA), covering material from 1977 to the present, complete with abstracts.

Material prior to 1969 is not contained in computer files but can be found in the KWIC Index of Rock Mechanics Literature.

Enquiries may be made by post or telephone, and may be expressed in the enquirer's own words or as a list or combination of keywords. Background information on the project requiring the search is also useful.

The cost of this service is £25 per search topic + 21p per GMA printed reference, plus VAT. Airmail postage will also be added, where necessary.

Enquiries should be addressed to the Rock Mechanics Information Service at the above address.

Geomechanics Abstracts Data Base

All material published in Geomechanics Abstracts since 1977 (plus some additional material) is now contained in the computerized online data base, GMA. GMA is available to the public for literature searching.
